

12v 15 watt solar battery charger regulator

Can a solar regulator charge a 12V battery?

Solar Regulators (also known as charge controllers) enable you to charge 12V batteries and power 12V appliances directly from solar panels. Due to a number of factors, the voltage that is supplied from solar panels will fluctuate - this means it is not suitable for charging batteries or power appliances directly.

What is a 12V solar charge controller?

A 12V solar charge controller is a device that measures the current that flows from the solar panel to the battery. Note that if the battery is fully charged, it may not accept current, resulting in a low current reading. (12V Solar Charge Controller, eBay)

What is a 12V solar panel charger?

A 12V solar panel charger is a device that charges various types of solar cells using a 12V power source. This particular model is made out of heavy-duty durable PVC material that is water and dust-proof. It has a 5A peak and 2.5A trickle charging circuit.

What is the best solar charger for heavy-duty batteries?

Heavy-duty batteries require heavy-duty chargers. Weighing 16 pounds, the 15W Solar Charger/Maintainer delivers a powerful 5W charge to 12-volt batteries in cars, boats, trucks, RVs, and snowmobiles through amorphous solar technology, even on cloudy days. The environmentally-safe unit is compatible with standard lead-acid batteries.

How to use solar trickle battery charger?

Easy to Use: This solar trickle battery charger starts to charge immediately when battery is registered, all three cables connections are plug and play. You can clearly know the charging status of the battery and solar panel through the indicator light. These items are shipped from and sold by different sellers.
