

Can a solar battery charger charge AA & AAA batteries?

Yes, a solar battery charger can charge typical consumer-size AA and AAA rechargeable batteries, including C and D. When the power grid goes down, the sun keeps shining! We can harness that energy with a solar charger for rechargeable batteries.

What types of batteries can the solar charger charge?

The solar powered battery charger will charge typical consumer-size AA & AAA rechargeable batteries including C & D. It is a practical preparedness item to have, especially when the power grid goes down, and the sun keeps shining.

Does a battery charger work with AA & AAA batteries?

It is also important to note that charging slows with each additional battery in bay. Users have noted that while this charger is capable of charging in array of battery sizes, it works most efficiently when charging AA and AAA batteries.

Is a solar battery charger useful?

A solar powered battery charger like the one pictured above is a practical preparedness item. It can charge typical consumer-size AA & AAA rechargeable batteries, including C & D. When the power grid goes down, the sun keeps shining, and you can harness that energy to charge your batteries.

How many AA batteries does a smart charger have?

Includes High-Performance Batteries: This charger comes with 4- AA2300mAh batteries. These are low self-discharge batteries which reserve 85% power when left sitting for up to one year. These batteries can be fully recharged in the smart charger in 40 minutes.

Does the battery charger have a solar array?

Adjustable Solar Array Lid: The battery charger has a 150 mAsolar array built into the lid. The lid is adjustable, and the charger comes equipped with a kickstand to allow for optimal sun exposure.
