

## Affordable companies that install solar batteries

How much does a solar battery cost?

Solar batteries range in price from \$8,500 to over \$10,000(not including installation) - so when purchasing and installing your battery,it's important to carefully determine where your system will be located.

Should I buy a solar battery?

You may be considering a solar battery if you're looking for resiliency,energy security,or cost savings(especially if you live in an area with time-of-use (TOU) rates or don't have net metering). While most home batteries are available today use lithium-ion chemistry,they come in a variety of shapes,sizes,and storage capacities.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak,you can pivot your home's energy consumption to run off of battery power rather than grid power,leveraging the electricity your solar panels generated when you need it most.
