

Are automotive solar battery chargers any good

Do solar battery car chargers work?

As long as you are using a solar battery car charger for the intended use, yes, they work. Solar battery chargers do not typically have multiple amperage settings, which means that they only provide a small amount of current to the battery.

Can a solar car battery charger charge a dead battery?

A solar car battery charger will not be able to charge a completely dead battery. They are not for this purpose. Solar-powered car battery chargers are trickle chargers, meaning they charge at a rate that's equal to the self-discharge rate. This enables batteries to remain fully charged at the proper level.

What is the difference between a solar car battery charger & regular Charger?

Besides the obvious difference of the power source, the main difference between a solar car battery charger and a regular charger are that standard chargers are more commonly used to fully charge a dead battery.

Can you use a 12 volt solar car battery charger?

An elderly person, teenager, or dad with three kids at the heel can grab a 12-volt solar car battery charger and put it to work much easier than a standard electric charger. You don't have to figure out amperage and voltage as you do with wall socket chargers. Instead, you just use the charger wherever you are and get going.

Which solar charger should I use outside my car?

For use outside the car, the Photonic Universe 10W would be our choice, with the Topsolar panel close behind. Solar chargers are incredibly useful but should the worst happen then you will need a jump starter pack. [Click here to discover the best car jump starter packs...](#)

What is a solar panel for charging car battery?

A solar panel for charging car battery works off a simple concept, though the details are, of course, more complex. Basically, a solar panel is crafted with charging car batteries in mind and has the proper connectors to use for this purpose.
