

I haven't experienced this myself but, based on other posts, it appears that some panels have an issue that can cause the battery to drain back through the panel somehow (a blocking diode ...

Overall, the Arlo solar panel should not drain the battery, but rather, it should provide the battery with a reliable charging source. In most cases, a drained battery is a result ...

Yep, I had the exact same issue with the Wasserstein panels. I also had a feeling it was because it felt it was on full AC and so upped its power consumption

I recently purchased compatible solar panels to help keep them charged. In just one day, both camera's batteries were drained. This looks to be the same issue with the attached solar panels that others are having. There ...

You're not alone in this solar-powered paradox. In this guide, we'll unpack why your Arlo solar panel draining battery issue might be happening and turn you into a solar ...
