

# Automotive battery charger for solar system

How to choose a solar car battery charger?

Our review is coming to an end, and we hope that you now have all the keys to wisely choose your solar car battery charger. Don't forget that models below 25W are battery maintainers and will only compensate for the natural loss of your car battery. They should be connected at all times when your car is not in use.

Why should you use a solar car battery charger?

The main function of a solar car battery charger is to cover the self-discharge and the constant small electricity drain from car electronics. The main benefits of a solar car battery chargers are: Prevent self-discharge of your battery - no more low battery. Increase overall battery life duration.

What is a solar car battery charger?

The solar car battery charger from ECO-WORTHY is a kit including a 25W (18V,1.2A) solar panel,a 3A solar charge controller with a USB output,and two connectors - battery crocodile clips and O-ring terminal cables. Thanks to its 25W solar panel,this model is able to not only maintain the state of charge of your battery but also charge it.

What are the different types of solar car battery chargers?

There are two categories of solar car battery chargers: Solar trickle chargers help to maintain your battery at a steady state of charge. It prevents your battery from being drained when it is not used,as 12V batteries naturally lose energy over time. A solar car battery trickle charger will never charge your battery to its full state.
