

How much does solar cost in Massachusetts?

Take control of your energy costs with solar power. Average solar panel installation costs range from \$11,480 to \$32,800 in Massachusetts. How much you end up paying depends on the size of your system, what incentives you're eligible for and other factors.

How much does a 5 kW solar system cost in Massachusetts?

While a 5 kW system will only cost you \$15,598 in Massachusetts, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Massachusetts?

How many solar panels are there in Massachusetts?

Massachusetts has nearly 150,000 solar panel installations. 24.48% of Massachusetts electricity comes from solar energy. Solar jobs account for over 11,000 positions in Massachusetts. The state has invested \$9.9 billion into solar. The cost of solar panels has fallen by 42% in the last decade.

How much do solar panels cost in Boston?

Other homes may need a 10-kW solar panel system, which runs for \$25,300 after the tax credit. In Boston, solar panels cost around \$21,700 for a typical 6-kW solar panel system. After the 30% solar tax credit, the total price goes down to \$15,200.

Are solar panels worth it in Massachusetts?

Solar panels are worth it in most areas, including Massachusetts. Certain factors, including the cost of electricity, incentives, climate, and the angle at which the sun hits your roof impact how quickly you break even on your investment relative to other areas around the U.S.

How can I save money on solar panels in Massachusetts?

If you use less electricity, you need fewer solar panels, making the whole system cheaper. Use incentives: Massachusetts has multiple local incentives and programs. Additionally, some solar panel manufacturers offer rebates on their products. While these aren't specific to Massachusetts, they can still provide additional savings.
