

How much does a solar battery cost?

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Does Sunnova offer home solar & battery storage?

Sunnova offers home solar and battery storage across California, protected by our leading 25-year warranty. You can get a new Sunnova home solar & battery storage system for \$0 down and, if you own your system, you could also be eligible to claim up to 30% of your installed system's cost on your federal taxes.

What is California's Solar Rebate program?

Rebate amount: Up to \$1,000 per kWh. Savings: Can cover nearly 100% of the battery system cost--making storage essentially free for many qualifying families. Starting June 2, 2025, California is rolling out a new \$280 million incentive specifically for low-income residents installing paired solar and battery systems:

Can I get a new solar & battery storage system for \$0 down?

You can get a new Sunnova home solar & battery storage system for \$0 down. Additionally, if you own the system, you could be eligible to claim up to 30% of its installed cost on your federal taxes. *Does this sound appealing? Talk with a home energy expert & get a quick quote today.*

Why do you need a solar battery?

With a battery, you can store that excess solar power yourself. Then, you can use your own stored solar energy in the evening or when electricity rates are high, bypassing the lower NEM 3.0 export rates and maximizing the value of your solar system. SGIP makes adding this battery more affordable.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.
