

Calculator ti30xs not working solar battery

What battery does a TI-30XS MultiView use?

The TI-30XS MultiView(TM) and TI-34 MultiView scientific calculators both use one 3 volt CR2032 lithium button cell battery. For safety purposes and to prevent ingestion, the button-cell batteries in school- and student-owned calculators without battery doors are not designed to be replaced.

How do I remove a TI-30X calculator?

Ensure that your calculator is a TI-30X IIS by looking in the top right corner of the front face. Look at the rear face of the calculator and locate the four case screws. There are two at the top and two at the bottom. Use a Philips 00 screwdriver to remove the four case screws on the rear face of the calculator.

What if my calculator does not power on?

See If your calculator does not power on, please see Warranty Information on Texas Instruments Products Purchased in the United States and contact TI-Cares to obtain service information.

Can I replace the battery on my Calculator?

It is possible to replace the battery by removing the back case of the calculator, but opening the back of the calculator voids the one-year, limited warranty. This must be done carefully, as we cannot be held responsible for any damage caused when you attempt to replace the battery.

Can you replace a battery in a calculator without a door?

For safety purposes and to prevent ingestion, the button-cell batteries in school- and student-owned calculators without battery doors are not designed to be replaced. It is possible to replace the battery by removing the back case of the calculator, but opening the back of the calculator voids the one-year, limited warranty.

How do you remove a battery from a calculator?

Use the spudger to pry into the space between the blue back cover and the white body to take off the back cover. Using the #00 Phillips screwdriver unscrew the two, 3mm Phillips screws located near the top of the calculator. Lift the metal plate from the battery and set it to the side. Use the spudger to lift the battery up from the black holder.

I'm using the silver/grey TI-36X Solar and as some might know, it relies solely (buh dun tsss) on light power. There's no battery. So you can imagine if the lights are dimmed, or it's been in storage for a while, it won't come on. So my ...
