

Can you replace a solar watch battery?

You can replace a solar watch battery, but chances are you will not need to for years and years. Regular maintenance, such as cleaning the dirt and sweat off the watch's body, will help prolong the battery's span. Solar watches use sunlight to generate the electrical energy needed by the watch to keep ticking.

Do solar-powered watches need batteries?

A solar-powered watch needs to have a battery to store the electrical energy that has been converted from light by the solar cells. This battery can be either a rechargeable or non-rechargeable battery such as a lithium-ion, nickel metal hydride, or alkaline. Some manufacturers, like Citizen, claim their solar watches don't use batteries.

Do Eco-Drive solar watches need to be replaced?

An Eco-Drive solar watch uses a specific type of rechargeable battery called a secondary battery, which may eventually need replacement as it ages. Remember, if you're not comfortable doing battery replacement yourself, consider taking your watch to a professional. You tinker with your watch's heart after all- you want to handle it with care.

Can a solar watch run out of battery?

But, of course, there's an exception. If you leave the solar watch in a dark place for too long, say upward of six months, you may need to replace the battery. But as long as the watch is getting adequate sun exposure, among the perks of using a solar watch is that the battery never runs out, even when you have abandoned it for too long.

Should you buy a solar watch?

Low prices encompass the short-term benefits while the sheer longevity of the battery and watch offers all of the benefits of an affordable, long-term value. Most solar watches have replaceable batteries, but the odds of having to get the battery changed out are very low.
