

What is the replacement battery for Casio watches?

Panasonic CTL920 /CTL920F Battery is the original replacement battery for Casio watches. It is a rechargeable battery that fits many Casio models such as G-Shock, Edifice, Lineage, Pathfinder, Pro Trek, Tough Solar, Wave Ceptor. This battery fits the following Casio models:

What is Casio Tough Solar System?

The CASIO Tough Solar System is so advanced that even the weakest light sources are sufficient to operate the watches. The solar cells are so small and inconspicuous that they can be integrated easily into every watch face design. CASIO's solar field can also be manufactured in any color and design.

How does a Casio solar charging system work?

This original Casio solar-charging system employs solar panels that convert light even from fluorescent lamps and other sources, combined with an internal rechargeable battery. It generates ample power for smooth operation of power-hungry functions, from measurements to radio wave reception, Bluetooth® connectivity, lights, and alarms.

Does edifice use a coin battery?

Any EDIFICE watch uses a coin battery, but it is not the same for all watches. We composed a table that will help you to choose the battery you need. You should only examine the rear cover of the case to know the module number or the watch's name. What is the EDIFICE watch battery size?

How do edifice solar watches work?

EDIFICE Solar watches are powered by light energy. The solar fields "catch" the light and transform it into energy. The CASIO Tough Solar System is so advanced that even the weakest light sources are sufficient to operate the watches. The solar cells are so small and inconspicuous that they can be integrated easily into every watch face design.

What are edifice solar watches?

CASIO's solar field can also be manufactured in any color and design. An accumulator in EDIFICE solar watches saves "superfluous" energy and releases it when the watch is in darkness. EDIFICE Solar watches are always equipped with an accumulator. The accumulator is charged automatically and does not require manual activation.

This watch runs on power supplied from a rechargeable (secondary) battery that is charged by a solar panel. The solar panel is integrated into the face of the watch, and power is generated whenever the face is exposed to light.
