OEM, Distributor, System Integrator, Government, VAR, Dealer, Contractor, MWBE, International, and Reseller discounts available.

Do gel batteries outlast AGM batteries?

In cold climates AGM capacity loss is minimal and will have a slightly higher voltage at lower temperatures. In hot weather climates, gel batteries tend to outlast AGM batteries due to the nature of the Deka gel electrolyte formula. Both are considered "non-spillable".

Why are gel and AGM batteries better than lead-acid batteries?

The "acid-starved" condition of Gel and AGM batteries protects the plates during heavy deep-discharges, giving more protection to the plate. Because of this inherent protection, AGM and Gel batteries are better suited for super-deep discharge applications than traditional lead-acid batteries.

What are Deka solar batteries?

Deka Solar batteries are valve-regulated, gel electrolyte or absorbed glass mat batteries designed to offer reliable power for frequent deep cycle solar power applications where minimum maintenance is required. Contact us toll-free: (877) 297-0014 for wholesale prices and complete systems using these batteries.

Which battery is best for solar energy storage?

Very popular for solar panel system energy storage due to their longevity and lack of fumes due to their sealed container. The Absolyte GP industrial sealed battery by GNB Industrial Power is a VRLA battery that does not require added water for the life of the battery.

What is the difference between gel electrolyte & absorbed glass mat batteries?

Gel electrolyte and Absorbed Glass Mat batteries are valve regulated lead-acid. In a gel battery, the electrolyte does not flow like a normal liquid. The electrolyte has the consistency and appearance of petroleum jelly. In an AGM battery, highly porous microfiber separators completely absorb and trap the electrolyte.
