

Cheapest containerized renewable power supplier in South Africa

What is a container energy storage system?

A Container Energy Storage System (ESS) is a modular,scalable solution for storing electrical energy. It typically consists of batteries housed in a shipping container,which makes it easy to transport and deploy. These systems can be used for various applications such as grid support,renewable energy integration,and backup power.

What are VAC solar containerised solutions?

The VAC Solar containerised solutions include the required high voltage inverters,LiFePO4 batteries and MCCs (Motor Control Centres) complete with the AC and DC switch gear and protection i.e. circuit breakers,change over switches,fuse protection and SPDs (surge protection devices).

What is a containerised substation?

Purpose made substations, housing erected, tested and commissioned indoor distribution switchgear in one complete package. RWW's containerised substations are designed, manufactured, fully assembled, wired and operationally tested in our workshops, therefore site works are minimised along with delays due to inclement weather.

What is a containerised PV plant?

The deployment of containerised PV plants is a fast and convenient method of deploying a new system in remote locations where brick and mortar buildings are not available. These plants can be built and commissioned off site and reduces the time from order placement to energy production significantly.

What drives RWW development of containerised outdoor substations?

Customers requiring shorter overall delivery times and minimal on-site workhave been the main drivers for RWW development of containerised outdoor substations.
