

Where can I buy off-grid solar panels in the UK?

Welcome to BMS TECHNOLOGIES LTD, your premier destination for high-quality off grid solar panel kits in the UK. Whether you're looking to power your remote cabin, reduce your carbon footprint, or ensure your home has a reliable source of energy during outages, our comprehensive selection of off grid solar systems is designed to meet all your needs.

What is a complete off-grid Solar System?

Complete Off-Grid solar systems include solar panels, panel mounts, batteries, power inverter and everything required to generate, store and deliver off-grid energy. Partially off-grid solar systems are connected to the grid and can either supplement grid electricity or provide a green alternative with the grid as a backup.

What does an off-grid solar system kit include?

Complete Off-grid Solar Kits with Batteries. Technical Support. Sunstore Solar's ready-to-install off-grid solar system kits include everything needed to install and run renewable, efficient energy for rural locations, outbuildings and leisure vehicles.

Why should you choose an off grid solar panel kit?

Traditional power sources can be unreliable and costly, especially in remote areas. Off grid solar panel kits provide a sustainable and cost-effective alternative, ensuring you have a consistent and eco-friendly power supply. Our kits eliminate the dependency on grid electricity, giving you peace of mind and control over your energy needs.

Do you need an off-grid Solar System?

Most solar panel installations will supply energy to your home and then offload the excess into the grid. An off-grid system needs to retain some of that power for when the sun isn't shining. This is Britain after all so we need to plan for those times when you're not generating your own green energy!

How much does an off-grid solar system cost?

Placing an exact cost to an off-grid solar system is difficult given the range of options open to you. As an average, a complete off grid power system for a three bedroom family home would cost between £15,000 and £28,000 including fitting. A smaller 2.2kw option as described above could cost around £12,000. Prices correct as of September 2019.
