

Complete whole house solar system batteries

What is a complete solar system kit?

Complete solar panel system kits that are the most energy efficient and reliable on the market today. Solar packages include everything you need to get your residential system up and running. Simply determine your required energy use and select the solar kit that is right for your home.

What is a whole home battery backup power system?

Whole home battery backup power systems store electricity to power your entire home during outages. Charged by solar panels or the grid, these batteries automatically kick in when the power goes out, keeping lights, appliances, and essential devices running.

What is a solar battery backup system?

Solar battery backup guarantees a power source-- even during a grid service failure or natural disaster. When the grid goes down, a solar battery backup system automatically detects and transitions your solar system from grid power to backup power. Protect your home from outages with our solar battery backup kits. Shop What's in a kit? FAQ

Is a solar home kit a good investment?

A solar home kit is a great investment to supply your home with clean, renewable power. SunWatts can help you find and install the perfect solar kit for your home. Complete solar panel system kits that are the most energy efficient and reliable on the market today.

How do solar battery kits work?

Solar battery kits give you everything you need to power your home and keep it running during a grid outage. When utility power is available, your solar panels generate electricity that can roll back your energy bill. If the power goes out, the system draws energy from the battery bank to keep your most important electrical loads running.

What are all-inclusive solar kits?

These all-inclusive solar kits are designed for simplicity, featuring everything you need for a seamless setup and installation. With high-performance lithium battery options and versatile connectivity options, our solar power systems can be connected to solar, wind, backup generator, or utility grid sources.
