

Container solar panels turnkey solution price in France

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

What is the VAT rate for solar panels in France?

A reduced VAT rate of 10% instead of the standard 20% applies to solar panel installations in France. This measure is available for residential properties used as primary homes. Many regions in France offer additional subsidies for solar panel installations. These initiatives can significantly lower initial costs.

Can you sell solar panels in France?

In France, it is possible to sell the electricity produced by your solar panels to EDF or another energy supplier. The feed-in price depends on the power of your installation and the conditions of the contract. The average lifespan of solar panels is around 25 years.

How much do DIY solar panels cost?

DIY solar panel kits are around the price of purchasing the panels through an official company and having one of their electricians install them. The average price for a DIY kit including 16 panels is around EUR6,250.

Do I need a permit to install solar panels in France?

Before installing solar panels in France, it is important to determine whether a special permit is required. For most residential homes, bureaucratic procedures are minimal, but certain factors may require additional approvals.
