

Containerized microgrid turnkey solution price in New Zealand

Why do we need a microgrid system?

Over recent years, our changing climate has highlighted the need for energy resiliency. Microgrid systems can offer access to energy, increased autonomy from the electricity network, increased reliability, resiliency to climate change impacts (e.g. cyclones), reduced electricity bills, lower green-house gas emissions, and environmental stewardship.

What is a grid-connected microgrid?

Grid-connected microgrids: They have a physical connection to the utility grid through a switching mechanism at the PCC (Point of Common Coupling); however, they can be disconnected into island mode and reconnected back to the main grid when required.

What is EAAs financing for microgrids?

EaaS is a financing model for microgrids that allows you to avoid upfront costs. Similar to a software-as-a-service model, with EaaS you avoid capital expenditures and instead pay only for ongoing service. Discover microgrid types and related business models.
