

How much does a solar battery cost in Australia?

In 2025, the solar battery cost for Australian households starts from \$4,500, with larger systems exceeding \$12,000. This variation depends on battery size, brand, and whether it's installed alongside solar panels or retrofitted into an existing system. There are two key rebates that can help reduce the cost significantly:

How much does a 10 kWh solar battery cost in Australia?

The average price for a 10 kWh solar battery ranges between \$8,000 - \$10,000. While the uptake of solar panels in Australia is really strong, the same cannot be said for solar batteries. A newer technology, battery storage has been viewed as expensive - especially when comparing the payback of a battery system against its expected life.

Should Victorians add a battery to their solar PV system?

With the rising cost of electricity, many Victorian households are adding a battery to supplement their solar PV system. Consider whether a battery system is right for you now, or down the track. Section 2: What incentives are available to Victorians for solar battery systems?

What is the Victorian solar battery rebate?

The VIC solar battery rebate has played a big role in helping households add battery storage to their solar systems. Originally, the Victorian Government offered both rebates and interest-free loans under its \$1.3 billion Solar Homes Program.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.
