

Ctek d250s solar connection drain battery

Can CTEK d250s be used with other batteries?

Using the CTEK D250S DUAL and SMARTPASS products, you can maximize the performance of your 12VDC source. SAFETY oThe unit is designed for 12V lead-acid batteries. Do not use the unit for any other batteries. oUse safety glasses when connecting or disconnecting a battery. oBattery acid is corrosive.

Does the d250s dual have a service battery?

The D250S Dual has 2 inputs. The Service battery will be charged from the alternator, solar panel, or both in combination. The solar panel adjusts itself to the Starter battery voltage. The Starter battery will be charged and maintained directly by the solar panel if the Service battery is fully charged.

Does a CTEK d250s work with a Hilux canopy?

I've had a Ctek D250S in my Hilux canopy for a few years. It charges my two 100ah AGM batteries for my fridges and lighting via the alternator. It has been working fine. I added a 250w solar panel today, connected it to the D250S to charge while I'm not driving. It's not working.

What is a d250s dual?

CONGRATULATIONS D250S DUAL on the purchase of your new CTEK professional battery management unit. This unit is part of a The D250S DUAL has 2 inputs. The Service battery will be charged from the alternator, solar range of professional battery chargers from CTEK SWEDEN AB. It represents the latest technology - panel, or both in combination.
