

Customized container solar kit quotation for South Africa project

Where can container power solutions be implemented?

Our container power solution can be implemented in various ways, including, but not limited to power backup, off-grid solutions, emergency power, energy stabilization and in various industries like hospitals, factories, corporate buildings, power stations and data centers. Looking to get more information about our Container Power Solutions?

What is a GC solar container power station?

Containers are custom built and may vary. GC Solar Container Power Station gives the flexibilities for industrial, large enterprises and corporate companies to deploy the system nearly in any nodes in the grid, supporting the services such as emergency power, new energy stabilizer, energy shifting, load shaving, grid stabilizer.

What is an off-grid container solar system?

An off-grid container solar system requires battery storage that must be designed correctly to generate enough power throughout the year and have the necessary battery capacity to meet the installed location's electrical energy requirements. Containers can offer the advantage of mobility that allows them to be moved to different sites.

What makes our container solutions unique?

Our container solutions are underpinned by meticulous planning, thoughtful design, and technical expertise. As a market leader, we continuously explore new technologies and can confidently design, build and deliver state-of-the-art container solutions that are sustainable, efficient, and requiring minimal maintenance.

What are VAC solar containerised solutions?

The VAC Solar containerised solutions include the required high voltage inverters, LiFePO4 batteries and MCCs (Motor Control Centres) complete with the AC and DC switch gear and protection i.e. circuit breakers, change over switches, fuse protection and SPDs (surge protection devices).
