

Customized mobile solar unit quotation for New Zealand project

How does solar power work in New Zealand?

Power is generated from solar panels during the day, appliances can freely use this energy. If appliances are turned off, solar power is sent to the grid, and sold to your energy retailer. Common residential grid-connected system sizes installed in New Zealand range between 3kW and 5kW. View grid-connect solar power system prices [here](#).

Why is solar a smart choice for homeowners in New Zealand?

With abundant sunlight and a commitment to a greener future, homeowners in New Zealand have a unique opportunity to embrace solar energy with SolarPulse NZ. Here are 9 reasons why going solar is a smart choice for homeowners in New Zealand. By reducing our dependence on fossil fuels, solar systems pave the way for a cleaner and healthier planet.

How long do solar panels last in NZ?

Panels and inverters (and batteries) have different design lifetimes and manufacturers warranty periods. However, most solar panels sold in NZ have a 25 year performance guarantee which states that a panels output shall be 80% of what it was when it was installed, in 25 years.

Why should you choose a custom Solar System?

A custom solar system is engineered to maximise efficiency by considering factors like shading, orientation, and tilt angles. This attention to detail ensures that your system operates at its highest capacity, generating more electricity and increasing your ROI.
