

How do I change the voltage on my battery tender Charger?

Press the "Select" button on the charger. Switch the Battery Tender charger's voltage back and forth a few times between 6V and 12V by pressing the button again. This helps ensure the unit registers your selection. Once you've toggled between voltages a couple of times, stop on the desired setting--whether 6V or 12V.

How do I Reset my battery tender Charger?

Unplug the Battery Tender Charger: Disconnect the Battery Tender charger from both the battery and the A/C power source. Allow the Battery Tender charger to sit unplugged for about 30 seconds. This helps to reset the charger's settings. Plug the Battery Tender charger back into the A/C power source, but do not connect it to the battery just yet.

Why is my battery tender not charging?

Rinse the electrical contacts using clean water and dry them thoroughly with a clean, dry cloth. Allow more time for the battery to charge if the red LED of your Battery Tender stays on longer than usual and the green LED does not come on. This usually means your battery is a large one, which takes longer to recharge.

How do you charge a battery tender?

Use needle-nose pliers to widen the quick-connect male pin contact area. Charge Current Return is less than 0.1 amp, whichever comes first. system must all be connected and NEG If the battery voltage does not reach 14.5 Clips or Rings POS volts within 72 hours, then the Battery Tender functioning plus will also go into storage mode. properly.

How do I know if my Battery Tender is charging?

Try connecting to another outlet that you know has power. Disconnect your Battery Tender from the battery, and then connect a voltmeter to the battery terminals to check the voltage if the green LED comes on too quickly when you first start charging the battery. This may mean the battery already has a full charge.
