

Government subsidy for collapsible solar panel container in Poland

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

Are prosumers eligible for a solar subsidy?

Net-billing prosumers who incurred installation expenses after Jan 1, 2021, are eligible. The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage.
