

Government subsidy for container solar mounting in Norway

What are the new solar rebates in Norway?

Norway's clean energy agency Enova will increase the maximum PV system size eligible for rebates from 15 to 20 kW and the maximum subsidy amount from 1,250 to 2,000 NOK (\$226.7) per kW installed. In addition, new subsidies of up to 10,000 NOK will be introduced for energy management systems that are often installed alongside solar arrays.

Is solar energy a viable option in Denmark?

The government supports solar PV installations through net metering schemes and tax exemptions, making solar energy a viable and attractive option. Denmark's commitment to integrated energy systems and smart grid technologies further enhances the potential of solar PV, integrating it seamlessly into the national energy mix.

How much solar power does Norway have in 2023?

In 2023, solar PV provided 1% of the electricity into the Finnish grid (Electricity Maps, 2024). Norway, having had plenty of hydropower, only recently began to tap into solar energy. The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023.

What is Norway's new state guarantee scheme?

Through the new state guarantee scheme, Norway will help to mobilise both private and public sector capital for investments in renewable energy in developing countries by reducing risk and thereby lowering capital costs for investors. The scheme is a pilot with a duration of five years and a guarantee budget of NOK 5 billion.

How much solar power does Norway have?

The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023. About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar.

Why are solar PV installations increasing in Sweden?

In Sweden, solar PV installations have grown exponentially. As of 2023, the country had a total installed solar PV capacity of 4.1 GW. This surge is largely attributed to government initiatives such as investment support schemes, which cover up to 20% of the installation costs for solar PV systems.

Overall, subsidies to farms represent around 60% of gross farm income (see chart). Farmers are not only supported by government-funded subsidies but also benefit from special tax breaks and from custom's tariffs on ...
