

Government subsidy for container solar mounting in Vietnam

Why has the Vietnamese government temporarily suspended solar projects?

To address the rapid growth and grid capacity issues, the Vietnamese government has temporarily suspended new approvals for large-scale solar projects. This measure aims to manage the grid's ability to integrate new capacity and transition from the FiT scheme to an auction-based system for project approval and pricing.

How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

What challenges has Vietnam faced with anti-dumping tariffs on solar panels?

This speaks to the challenges Vietnam has faced related to anti-dumping tariffs on solar panels, particularly concerning accusations of illegal transshipments. Some foreign companies have attempted to label Chinese-made solar products as Vietnamese to bypass higher U.S. tariffs.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

Are Chinese solar products circumventing US duties?

Late last year, some solar products exported from Vietnam, Thailand, Cambodia, and Malaysia were found to be circumventing duties applied to some Chinese solar products by the US Department of Commerce.

To accelerate the development of the renewable energy industry, the Vietnamese government has introduced a new electricity decree, prioritizing the promotion of power generation projects using renewable energy sources ...

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053 ...

As Vietnam continues its rapid economic development, the demand for sustainable and reliable energy sources has never been more critical. Solar power has emerged as a key component of Vietnam's strategy to diversify its ...

Given an uneven economic recovery, Vietnam's ample fiscal space can provide room for the government to

Government subsidy for container solar mounting in Vietnam

extend additional support measures to vulnerable segments such ...

This explosive growth has affected the stability of Vietnam's power distribution system. According to the Vietnamese government's draft of power development plan this year, Vietnam needs to invest as much as \$128.3 billion ...

On 22 October 2024, the Vietnamese government promulgated its long-awaited Decree No. 135/2024/ND-CP governing the mechanism and policy for incentivising the development of self-consumption rooftop solar power ...

On April 6, 2020, the Prime Minister of Vietnam issued Decision No. 13/2020/QĐ-TTg on the mechanism for encouraging the development of solar power in Vietnam ("Decision 13"). Decision 13, which will take effect on May 22, 2020, ...
