

Government subsidy for container solar solutions in France

Does France offer subsidies for solar panels?

Many regions in France offer additional subsidies for solar panel installations. These initiatives can significantly lower initial costs. To qualify for government subsidies, it is recommended to hire certified professionals with the RGE (Reconnu Garant de l'Environnement) license.

What is a solar subsidy?

It is a one-off subsidy paid for by energy suppliers to help cover some of the costs of panel installation and is aimed at solar thermal panels, whether just to heat hot water or also for the central heating system. Photovoltaic panels are not eligible.

How much does a ground-mounted solar project cost in France?

Broadly speaking, for ground-mounted solar projects located in mainland France, the FIT will be reduced from EUR 570 per MWh to EUR 30 per MWh. The minimum FIT will be in the range of EUR 18 to EUR 50 per MWh, and the average FIT will be around EUR 30 per MWh.

Do I need a permit to install solar panels in France?

Before installing solar panels in France, it is important to determine whether a special permit is required. For most residential homes, bureaucratic procedures are minimal, but certain factors may require additional approvals.

Does EDF buy back surplus solar energy?

National energy companies such as EDF have an obligation to buy back surplus energy produced by solar panels. This bonus is only for the installation of photovoltaic panels.

How much money does the European Union spend on green projects?

With an overall budget of 100 billion euros, a significant portion of which is allocated to green initiatives, it supports the decarbonisation of industry, the energy renovation of buildings and the development of renewable energies. The aim is to reduce CO2 emissions, improve energy efficiency and create sustainable jobs.
