## Government subsidy for mobile solar station in Finland

What is Finland's energy subsidy scheme?

The aim of the subsidy scheme is to promote energy investment and energy infrastructure projects that are in line with the Sustainable Growth Programme for Finlandand that reduce greenhouse gas emissions in Finland and support the country's 2035 carbon neutrality target.

Where can I find information about energy investment subsidies in Finland?

Website of Business Finland: First application round for energy investment subsidies On 4 October 2022, the Ministry of Economic Affairs and Employment made the first energy investment aid decisions under Finland's Recovery and Resilience Plan to promote clean energy solutions. Aid was granted to six projects totalling EUR 99.8 million.

Why is Finland halting subsidies for solar projects?

The electricity market in Finland remains volatile, making long-term forecasting and planning challenging. While Finland has made commendable progress in solar development, the government has recently decided to halt subsidies for solar projects. Backing will instead be allocated to hydrogen projects.

How much does solar energy cost in Finland?

Off-grid installations equipped with batteries cost between 3,500 euros and 5,000 euros per kilowatt. In Finland,self-consumption of solar energy is exempt from grid charges and electricity taxes (up to a maximum of 800 megawatt hours per year). Companies and municipalities receive subsidies of 24 to 40 percent if they invest in photovoltaics.

What is Finland doing with solar technology?

Finland has made impressive strides in solar technology. For example, Solnet Group has invested heavily in research and development, leading to energy storage possibilities and grid optimization. These advancements are critical for optimizing grid operation and stabilizing energy consumption.

Can solar power improve grid stability in Finland?

Solar power can enhance grid stability in Finlandby providing a decentralized energy source and this can be especially beneficial during extreme weather conditions or unforeseen disruptions. Developers vs. landowners
