

Government subsidy for mobile solar unit in Dominican

What is the current condition of the Dominican energy sector?

The PEN presents the current condition of the Dominican energy sector while outlining its future development. The DR's installed generation capacity connected to the National Interconnected Electric System (Sistema Eléctrico Nacional Interconectado - SENI) is around 5,631.47 MW and the average peak demand is around 3,312 MW.

Why are billions of dollars being dumped into the electricity subsidy?

The billions of dollars being dumped into the electricity subsidy just continue to perpetuate the struggling power sector in a negative feedback loop -- the subsidy supports burning fossil fuel to allow for more and more energy consumption, which further increases the need for the subsidy.

Is the electricity subsidy just a Band Aid?

In a changing world with highly volatile fuel prices, an increasing frequency of grid-impacting storms, and a drastic cost reduction of an ever-improving solar technology, the electricity subsidy is just a band aid for the much larger issue at hand: a power sector reliant on fossil fuel.

The Dominican Government enacted law 57-07 (2007) to support renewable energy development; however, only six projects have been successfully executed. Despite this, solar energy ...
