

Government subsidy for modular solar container in Indonesia

What are the government incentives for solar energy in Indonesia?

****Feed-in Tariff Program**** Another important government incentive for solar energy in Indonesia is the Feed-in Tariff Program. This program guarantees a fixed payment rate for electricity generated from renewable sources, including solar energy.

What is the local content of solar energy projects in Indonesia?

According to MEMR Decree No 5/2017, the local content for energy projects in Indonesia was a minimum of 40% in 2017 and will be gradually increased up to 60% in 2019. Due to the relatively small scale of solar manufacturing in Indonesia, it is unlikely that local production can be competitive against international prices.

Does Indonesia have a potential for solar energy generation?

Indonesia has significant potential for solar energy generation due to its location in the sun-rich equatorial region and the availability of large areas of land. However, the country has not yet fully exploited this potential. As of 2021, solar energy accounted for a relatively small percentage of Indonesia's total electricity generation mix.

What is a floating solar plant in Indonesia?

The project was developed by a unit of Indonesia's state utility company, Perusahaan Listrik Negara (PLN), in collaboration with United Arab Emirates renewable energy company Masdar, a unit of Mubadala Investment Company. The plant is the third-largest floating solar plant in the world.

Are locally produced solar modules cheaper than imported solar modules?

Zaeny Ahmad, Head of Plan of PT Indonesia Solar Global, emphasized that the price of locally produced solar modules is not very competitive compared to imported products, where there is still a price difference of around 40% between them.

Can large solar plants sell unsubsidized electricity in the UAE?

A study by Khalifa University reveals how large solar plants in the UAE can sell unsubsidized electricity for under USD 3 cents/kWh while still making a profit. The two main factors that contributed to the low price are the plummeting cost of solar panels and the reduced cost of financing.
