

Government subsidy for portable solar power box in Vietnam

Why has the Vietnamese government temporarily suspended solar projects?

To address the rapid growth and grid capacity issues, the Vietnamese government has temporarily suspended new approvals for large-scale solar projects. This measure aims to manage the grid's ability to integrate new capacity and transition from the FiT scheme to an auction-based system for project approval and pricing.

How has the FIT program impacted solar power development in Vietnam?

The FiT program has been a major driver of solar power development in Vietnam, offering a tariff of 9.35 cents per kilowatt-hour (kWh) for projects completed by June 2019. This program led to a surge in solar capacity, reaching 4.46 gigawatts of new installations.

What challenges has Vietnam faced with anti-dumping tariffs on solar panels?

This speaks to the challenges Vietnam has faced related to anti-dumping tariffs on solar panels, particularly concerning accusations of illegal transshipments. Some foreign companies have attempted to label Chinese-made solar products as Vietnamese to bypass higher U.S. tariffs.

Are Chinese solar products circumventing US duties?

Late last year, some solar products exported from Vietnam, Thailand, Cambodia, and Malaysia were found to be circumventing duties applied to some Chinese solar products by the US Department of Commerce.

This article introduces the development status of solar energy in Vietnam, and the challenges that photovoltaic companies are facing, also explains the reason why the solar energy industry in Vietnam can ushering in ...
