

# Government subsidy for pv storage container in Australia

What solar subsidies are available in Western Australia?

Here's what's available in Western Australia: National Government Rebate- This subsidy applies to all system sizes. For a 6.6kW system in 2025, it provides around \$2,052 off. Advertised prices for solar systems already include this discount. Feed-in tariff - You'll earn payments for any surplus energy your system generates and exports to the grid.

Do you qualify for a solar subsidy?

However, there are subsidy schemes available in different states and territories, as well as some local government areas, to help with the upfront cost of installing solar and batteries. These are in addition to STCs. Depending on where you live, you might qualify for: a rebate swap, where you receive a solar subsidy instead of bill rebates.

What incentives do Victorians have to go solar?

Victorians have a range of incentives available to go solar and electrify their homes: National Government Rebate- This subsidy significantly reduces the cost of solar panels, providing around a \$1,748 discount for a 6.6kW system installed in Melbourne in 2025. Advertised prices in Victoria already include this amount.

How much does a VPP cost in Canberra?

Earn between \$250 to \$400 for connecting your household or business battery to a VPP. Local Council Incentive - Residents of the Randwick local government area can receive a rebate of up to 10% off the cost of rooftop solar systems and home batteries. Further information can be found [here](#). Canberra residents have several incentives to choose from:
