

Government subsidy for solar power storage box in France

Does France offer subsidies for solar panels?

Many regions in France offer additional subsidies for solar panel installations. These initiatives can significantly lower initial costs. To qualify for government subsidies, it is recommended to hire certified professionals with the RGE (Reconnu Garant de l'Environnement) license.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR 540 per household per year.

Do I need a permit to install solar panels in France?

Before installing solar panels in France, it is important to determine whether a special permit is required. For most residential homes, bureaucratic procedures are minimal, but certain factors may require additional approvals.

How much does a ground-mounted solar project cost in France?

Broadly speaking, for ground-mounted solar projects located in mainland France, the FIT will be reduced from EUR 570 per MWh to EUR 30 per MWh. The minimum FIT will be in the range of EUR 18 to EUR 50 per MWh, and the average FIT will be around EUR 30 per MWh.

How much electricity can a solar panel save?

The amount saved does of course depend on how much you are paying for electricity now, and how much sunshine your solar panels are able to use. This depends significantly on location; for example, in one year, an average solar panel will produce more electricity in Marseille (620 kWh) than in Paris (430 kWh).

Where can I get a grant for solar panels?

There are also a surprising number of local, departmental, or regional councils who offer grants or loans towards energy saving equipment, notably towards the installation of solar panels. Check with your local mairie in the first instance, or the web site of your Conseil R#233gional.
