How long do g shock solar batteries last

How long does the battery of a G-Shock watch last?

The battery life of a G-Shock watch can last between two and fifteen yearsdepending on the model. A well-maintained watch could last around five or six years. A tough solar G-Shock,due to its solar-power charging abilities,will last much longer than a base model.

How long does a Tough Solar G-Shock battery last?

The short answer is that your Tough Solar G-Shock's battery will last for anywhere from 9 to 15 yearsbefore you have to get a new one, depending on how you use it. Specifically how long it will last comes down entirely to how you use the watch.

How much does a G Shock battery cost?

Financially speaking, the difference is between solar and non-solar G-Shocks insignificant. A new solar battery will cost you about \$25, and you'll need one every 12 years or so. A regular G-Shock will need a new battery every 5 years or so, and those are cheaper than solar ones (if you change them yourself).

Can a solar G-Shock use up the battery fast?

Too manycan use up the battery fast. Regular charging for solar models: Keep your solar G-Shock in the light to stop the battery from running low. Optimal storage: Keep your watch in a place that's not too hot or cold to avoid battery damage. It's important to know how storing your watch in different temperatures can affect the battery.

Which G-Shock has a 5 year battery?

G-Shock GA-700(5-year battery): Other than the GA-900 and AW-500 with a 7-year battery, the GA-700 is the only non-solar analog-digital G-Shock that has at least a 5-year battery.

How long does a Casio G-Shock last?

There are many factors that will influence the overall battery life of your Casio G-shock watch. For example, there are certain G-shock models that utilize solar energy. This means the watch can be recharged to last for several months, if not years, after only a few hours of exposure to direct sunlight.

I recall that Casio advertised a ridiculous lifetime of 30 years for the battery if memory serves me right, but 15 or so years seems more realistic if you keep it constantly ...
