

# Is it worth getting a battery with solar panels

Is a solar battery worth it?

It's incredibly difficult to quantify whether a solar battery will be worth it, as every household has different energy usage patterns. According to The Eco Experts, a typical three-bedroom home could save around £582 every year with a solar battery AND solar panel system. Yet most of this saving will come from the solar panels.

How much does a solar battery cost?

Solar batteries come with a hefty upfront cost. The actual cost will depend on your home and the size of the battery you want or need, but it can range between £1,000 and £10,000. You'll likely need two batteries during the life of your solar panels. Batteries last around 15 years, while solar panels last about 25 years.

Can solar batteries save you money?

Solar batteries can also save you money on utility power long-term. When utility costs are at their peak, you can pivot your home's energy consumption to run off of battery power rather than grid power, leveraging the electricity your solar panels generated when you need it most.

Do solar panels need more batteries?

If you're already generating large amounts of energy from your solar array with the majority being sent to the grid, more batteries will help your own energy efficiency and reduce your personal energy waste. Solar panels have a longer lifespan (25-30 years) compared to batteries (10-15 years).

Is a solar battery a good investment?

While the upfront cost can be high, the long-term benefits are significant. A solar battery can reduce your electricity bills, increase energy independence, and lower your carbon footprint. Ultimately, you'll be contributing towards a more flexible energy system for the future. Get a quick solar package quote online.

Should I buy a battery for my solar system?

With a battery, you can store this energy and use it later--reducing waste and increasing savings. You can also sell any spare energy you make to the grid through our Smart Export Guarantee (SEG) scheme. There are many, but lithium-ion batteries are the best option for your home solar system.

I think return on investment for solar is pretty quick these days, I installed solar 4 years ago and the system has paid for itself and then some. I would love batteries but some simple maths ...
