

What is the NSW solar battery rebate?

Save on solar battery costs and reduce your energy bills with the new NSW Solar Battery Rebate, launched on 1 November 2024. Under the Peak Demand Reduction Scheme (PDRS), the NSW Government is helping households and businesses with rooftop solar systems unlock the full potential of their solar energy.

What is NSW's 2025 battery rebate?

NSW's 2025 Battery Rebate is now a VPP incentive offering up to \$1,500 for eligible solar battery systems. See eligibility, savings, and how to combine with the federal rebate

Do batteries pay for themselves in NSW?

The good news is batteries can still pay for themselves in NSW with only the federal battery rebate. If you have arranged to get a battery installed with the expectation of receiving both the federal and NSW battery rebates, it can still be worthwhile even without the NSW state incentive.

Are solar batteries affordable in NSW?

The NSW Government will launch a new incentive to make household batteries more accessible and affordable for NSW residents. Households and businesses with solar panels on their roofs will be able to buy a cheaper, subsidised battery to store solar energy generated when the sun is shining.

How much does a solar system rebate cost?

Eligible homes and businesses can receive a rebate between \$1,600 and \$2,400 off the upfront installation cost of a new solar system battery, depending on the size of the battery. Additionally, an incentive of \$250 to \$400 is available for connecting the battery to a VPP.

Is the new Australian battery rebate a good idea?

The NSW government is no longer providing an upfront saving off new batteries. In place of that incentive, is the more generous, nationwide home battery rebate. The new Australian battery rebate provides greater savings than the initial NSW subsidy, so residents are far better off after the change.
