

How do I use the JamMan solo XT?

Use the JamMan Solo XT to: Record rhythm loops then solo over them on the fly, completely Hands-Free™. Slow down or speed up the tempo of any loop without changing pitch. Sync multiple JamSync compatible JamMan® devices for multi-track looping capabilities.

Why should you buy a Jamman solo XT?

Seamless transitions between looped phrases make the JamMan Solo XT an invaluable tool for composing and performing. Get the stereo looping experience you need from straight-forward backing loops to intricate loop layers by yourself or with your band.

Does JamMan solo XT have multiple loops?

Multiple Loop Playback with FS3X Another great feature of the JamMan Solo XT is its ability to play different loops back to back during performance using the optional FS3X Footswitch. This lets you play a verse > chorus > verse > bridge progression seamlessly using three different loops.

What is the difference between JamMan solo XT and jamsync?

Erasing All Loops (External Memory Card) The JamMan Solo XT allows you to quickly erase all loops from external memory. The erase procedure only erases JamMan Solo XT loop data. All other data and files on the card are left untouched. JamSync allows you to sync multiple JamSync compatible JamMan devices via 1/8" mini TRS cables.

Does JamMan solo XT have a rhythm guide?

The JamMan Solo XT has a built in Rhythm Guide Track with 9 Rhythm Guide Patterns to choose from, ranging from a simple click metronome to drum samples. This built-in Rhythm Guide Track can be used as a metronome to help you stay in time when recording loops. The available Rhythm Type options are:
