

What happens if a Sola battery is not charged?

Neglected batteries conserve remaining battery life to avoid deep discharge (battery damage) by hibernating. This can happen to a Sola light left in storage for an extended period of time or can also occur if the battery had been run all the way down after a dive and was not charged within adequate time for the battery to recover.

What happens if a Sola light is left in storage?

This can happen to a Sola light left in storage for an extended period of time or can also occur if the battery had been run all the way down after a dive and was not charged within adequate time for the battery to recover. *Deep discharge is a term for a battery in a state of unrecoverable and complete depletion.

What is a light & motion Sola?

The Light & Motion Sola line is one of the best and simplest underwater imaging lightsever created. It is one of our best sellers and performs consistently well under challenging conditions to help produce outstanding images. There are a few features and issues you may encounter. Here is a handy field guide for resolving some issues quickly.

How long does a Sola take to charge?

Be aware that the Sola can sometimes take up to 10 seconds to start charging even on a good day, so allow the light some time to begin charging after you've completed the tapping part of the process.

Are the battery charging contacts on the Sola corrosion prone?

One downside to the external battery charging contacts on the Sola is that they are prone to corrosion over time. As with all gear, proper post-dive care and plenty of fresh water rinsing will help prevent this. When the contacts on your Sola start to lose their shine or begin to show corrosion don't despair, they are easy to clean.

Why does my Sola light need a full charge?

This is normal, but may require a full discharge in water then full charge to ensure the light is fully functional. **BACK TO TOP WHICH CHARGER DOES THE SOLA NEED** There are 3 different chargers; Sola 1 Amp Charger, Sola 2 Amp Charger, Sola Fast Charger. This is to make sure the Sola charges safely as quickly as possible.
