

Mercedes-Benz has won the race to put the first solid-state battery -powered prototype vehicle on public roads for testing. The prototype, a modified Mercedes-Benz EQS sedan, incorporates a battery pack produced by ...

Mercedes-Benz on Monday announced the start of real-world testing of prototype solid-state battery cells from the U.S. firm Factorial. These cells were installed in a ...

The two companies have been working on a solid-state battery for a while now, having tied the knot back in 2021. Four years later, the world can witness the first results of the ...

After intensive testing on various test benches, the prototype solid-state battery was integrated into an EQS at the end of 2024. The all-electric car from Mercedes-Benz was ...

Following bench-testing, Mercedes installed a prototype solid-state battery into a Mercedes-Benz EQS Sedan at the end of 2024 for lab tests in Stuttgart. The car cleared that ...

Mercedes-Benz has apparently started testing a solid-state battery from partner Factorial Energy in a modified EQS this month. In the coming weeks, the Stuttgart-based company wants to collect data on the battery's ...

After testing, the prototype solid-state battery was integrated into a Mercedes-Benz EQS Sedan at the end of 2024. The vehicle was slightly modified to fit the solid-state ...

The exact specifications of the battery were not disclosed, but enough about it was made public for us to form a pretty decent idea of what to expect. As installed in the ...

Mercedes-Benz on Monday announced the start of real-world testing of prototype solid-state battery cells from the U.S. firm Factorial. These cells were installed in a Mercedes-Benz EQS sedan in ...

Mercedes has modified an EQS to test its prototype lithium-metal solid-state battery and the results are already looking really promising, taking range from 488 to a theoretical 621 miles. The ...

The prototype solid-state battery that has been integrated into the Mercedes-Benz EQS for testing features an innovative and patented floating cell carrier which, when the battery charges, allows the battery materials to ...

Mercedes-Benz and Factorial announced a prototype EQS equipped with a solid-state battery. Road testing has already started. Solid-state batteries promise more range, ...

Mercedes-Benz and American battery start-up Factorial Energy have developed a prototype EQS equipped with a solid-state battery. The companies claim it's the "world's first ...

After intensive testing on various test benches, the prototype solid-state battery was integrated into an EQS at the end of 2024. The all-electric car from Mercedes-Benz was slightly modified to fit the solid-state battery and ...

The German OEM's passenger car and Formula One engineers have teamed up to develop and patent a solid-state battery pack with cells from Boston-based solid-state battery leader Factorial Energy, with road tests in a ...

The prototype solid-state battery that has been integrated into the Mercedes-Benz EQS for testing features an innovative and patented floating cell carrier which, when the ...
