

Germany sets new record for renewable power Germany has accelerated its renewables deployment, with solar growing at a record pace. Wind, though currently lagging, is expected to gain momentum in the future.

Germany's total installed solar power capacity exceeded the 100 GW mark at the end of 2024, approaching nearly half of the 215 GW goal set for 2030, the German Solar Industry Association (BSW Solar) said on Monday.

In May 2023, the German government presented its photovoltaics strategy, which provides for a variety of measures to promote the expansion of solar power. The strategy ...

The EV Charging Financial Analysis Tool equips users with critical information on the financial performance of electric vehicle charging projects. The Microsoft Excel-based tool is capable of ...

Find out how Germany is becoming a global leader in renewable energy, with a focus on wind and solar power. Explore the initiatives, technological advances and policies that are propelling this ...

For the landowners we work with, this means having a single point of contact in their region who supports them from start to finish throughout the term of the contract. To ensure this, we currently employ over 50 project developers ...

The first of its kind, this study offers an overview of the photovoltaics and battery storage market in Germany. It provides the latest statistics on the PV market and battery storage systems, along with an examination of current funding ...

Renewables developer Milvio Energy has agreed to sell a portfolio of 11 ready-to-build (RTB) solar projects in Germany with a combined targeted capacity of 51.7 MWp to a unit ...

RWE Renewables focuses on the development of solar-plus-storage projects, while BayWa r.e. specializes in the development, sale and management of solar projects. Lightsource bp, in collaboration with BP, is also developing solar ...

The planning lead time for such projects is immense, and the financial risk often lies solely with the project developer. Banks are becoming increasingly skeptical about business models that are based on feed-in tariffs ...

The facility is set to become the largest solar plant in Germany and Europe. The project is expected to support

agricultural activities and might also be used for green hydrogen generation.

How to Calculate ROI for Solar EPC Investments? Investing in a solar photovoltaic (PV) project can be a wise financial decision for businesses and homeowners alike, providing long-term returns and environmental benefits. ...

"The location in Mecklenburg-Vorpommern was chosen not only for its strong solar radiation but also for the region's openness and support for such a sustainable project."

Mit mobilen Solaranlagen lassen sich mittlerweile nicht nur Camping-Ausflüge angenehmer gestalten. Auch für Wohnungen und Häuser eignen sich die Geräte, um Strom zu sparen und um im Notfall noch die ...

Germany is one of the most important markets for us in terms of installations. There is a growing interest in photovoltaic systems, which is supported by government subsidies and other programs. Demand for PV is ...

Our ready-to-connect, portable solar-powered electricity generators come in a wide range for use in the military, agriculture, pumping and for providing electricity to rural areas.
