

Mobile solar station quotation in Turkey 2025

How much does a solar project cost in Turkey?

Turkey has awarded 800 MW of solar capacity in its latest PV tender, with the final price set at \$0.0325/kWh. The authorities selected six projects ranging from 40 MW to 385 MW. Turkey's Ministry of Energy and Natural Resources said it has allocated 800 MW of PV capacity in the YEKA GES-2024 tender.

How much solar power will Turkey have by 2035?

According to government plans, the total installed capacity will reach 190 GW by 2035. According to the Energy Market Regulatory Authority's (EMRA) statistics, Turkey's cumulative solar capacity reached 19.4 GW at the end of 2024, scoring almost 37 % increase and doubling the capacity in just two and a half years.

Will Turkey reach 22.6 GW of solar capacity by 2025?

In October 2024, Turkey's 2025 budget proposal set a target of reaching 22.6 GW of cumulative solar capacity by the end of next year, up from 18.8 GW this year. This content is protected by copyright and may not be reused.

What is Turkey's latest solar tender?

Turkey has launched its latest solar tender, seeking 800 MW of capacity to be split between six projects in six regions across the country.

How big is Turkey's solar capacity?

According to the latest report by Ember Energy, Turkey's solar installed capacity has doubled from 9.7 GW in July 2022 to over 19 GW by the end of 2024, surpassing the 2025 target two years ahead of schedule.

How has solar energy benefited Turkey?

Over the past two and a half years, solar and wind energy combined have prevented \$15 billion in natural gas imports, reinforcing Turkey's energy independence and reducing dependency on fossil fuels. Solar energy alone generated 52 TWh of electricity during this period, which accounted for 6% of the country's total electricity supply.
