Can you create off-grid solar power systems using solar panels?

While our team specialise in creating off grid solar power systems using solar panels, it isn't the only option available. Depending on the resources available on your lifestyle block, your power system could be designed using wind turbines, micro hydro generators, solar panels, or a combination of both depending on your requirements.

What does an off-grid solar package include?

Our off-grid solar packages include everything you need to go off the grid in New Zealand: solar panels, batteries, charge controllers, inverters, cables, and DIY-friendly manuals backed by our lifetime support. Browse through our series below.

What is an off-grid Solar System?

An off-grid solar system is a fully self-sufficient energy system that operates without any connection to the national electricity grid. It generates, stores, and supplies electricity independently - using solar energy during the day and stored battery power at night.

What are the limitations of an off-grid Solar System?

All off-grid solar systems have limitations.. This is based on the number of panels, the size of the battery bank, and the capacity of the inverter/s. The PS: Tiny system is a small system for very basic requirements and will not be able to power the following. Attempting to do so may cause damage and void your warranty:

How many kWh will a small off grid solar system provide?

Allowing for this, the PS: Tiny off grid solar system will provide an estimated 4kWh per day. The exact number of panels needed depends on your situation. Get in touch and we can check your situation.
