

Is Panasonic discontinuing its evervolt solar & battery storage product line?

Another one bites the dust: Panasonic is discontinuing its EverVolt solar and battery storage product line. The company sent a letter to dealers on Monday, but noted they will continue to honor warranties. Re-read that warranty information here. "We have made the decision to discontinue our solar and battery storage business line.

Does Panasonic still make solar panels?

Panasonic was once a top manufacturer of solar panels, focused on higher end heterojunction (HJT) modules. The company stopped manufacturing solar modules in-house in 2021, and went all-in on solar + storage, acquiring a hybrid solar inverter and launching a battery line, all rebranded as the EverVolt. I didn't see this one coming.

How much does a Panasonic battery cost?

When it comes to battery pricing, you can generally expect to pay somewhere between \$1,000 to \$2,000 per kilowatt-hour of storage. You'll likely also pay between \$2,000 to \$3,000 for the installation of the battery. To get the most accurate price estimate for your home, you'll need to speak with a Panasonic-certified installer in your area.

How much does a Panasonic evervolt battery cost?

But Panasonic told us that the cost of the Evervolt Home Battery System is competitive with similar products. When it comes to battery pricing, you can generally expect to pay somewhere between \$1,000 to \$2,000 per kilowatt-hour of storage. You'll likely also pay between \$2,000 to \$3,000 for the installation of the battery.
