

The increasing emphasis on renewable energy sources and the need for portable, off-grid power solutions are some of the key factors driving the growth of the solar container market.

As we step into 2025, the container trading landscape continues to be shaped by elevated secondhand container prices, driven by uncertainties owing to geopolitical tensions, ...

In 2024, global photovoltaic capacity rose to more than 2.2 TW, up from 1.6 TW in 2023, with over 600 GW of new PV systems commissioned. This marks another record year for PV deployment, despite continued overcapacity in ...

The portable containerized PV system market, valued at \$3.142 billion in 2025, is experiencing robust growth, projected to expand at a Compound Annual Growth Rate (CAGR) of 11.2% ...

The photovoltaic (PV) container market is experiencing robust growth, driven by the increasing demand for decentralized and readily deployable renewable energy solutions. ...

After tumbling to record low in 2024 on the back of lower metal costs and increased scale, lithium-ion battery prices are expected to enter a period of stabilization.

According to our (Global Info Research) latest study, the global Portable Containerized PV System market size was valued at US\$ 3233 million in 2024 and is forecast to a readjusted ...

by Lloyd's List 18 December 2024 (Lloyd's List) - THE 2025 container shipping market outlook remains murky, with many variables at play and widely differing forecasts on vessel demand growth. In its latest market ...

The portable PV generator market, valued at \$183 million in 2025, is projected to experience robust growth, driven by increasing demand for off-grid power solutions and rising concerns ...

The International Energy Agency forecasts that the global RE capacity will increase by over 5,520 GW during 2024-2030, about 2.6 times more than RE deployment between 2017 and 2023. Solar power, encompassing ...

A recent Wood Mackenzie report examines two possible tariff scenarios and concludes that costs will skyrocket for both utility-scale solar development and battery energy storage systems.

The solar container market is experiencing robust growth due to several key factors. One of the primary drivers is the increasing global emphasis on renewable energy sources as ...

Bimco has forecast growth in demand for cargo of 3%-4% in 2025 and 3.5%-4.5% in 2026, with import volumes into south and west Asia, and south and central America, to grow the fastest.

That trend will reverse in the next few years, with small increases in price from 2025 onwards. Prices are expected to increase nominally in 2025, as shown in the chart above, before jumping more substantially in 2026.

Global PV module market outlook According to GlobalData's Solar PV Modules and Inverters Market Trends and Analysis report, the global solar PV module market was valued at \$102.76bn in 2023. The Asia-Pacific (APAC) ...

Looking ahead, experts anticipate a steady stabilization of container shipping prices. The International Maritime Organization (IMO) forecasts that by late 2025, the average price for a 40-foot container could ...
