

Portable solar generator shipping and installation cost in Finland

Can a solar power system be used at a summerhouse?

The solar power systems provided by Helen cannot be used at summerhouses that are not connected to the grid. The installation site needs to have an electricity connection as our solar power systems and electricity storages must be connected to the grid. Can a solar power system be used as a backup system in case of blackouts?

Where should I buy solar panels?

We recommend acquiring your panels from a reliable company that is sure to remain in business for the entire lifecycle of your solar power system. A good salesperson will answer any use-phase questions you may have, handle your warranty issues, if necessary, and enable you to expand your system and add new products to it.

Can a solar power system be used as a backup system?

A solar power system connected to the grid cannot be used as a backup system as the solar power system is automatically switched off in the event of any malfunctions in the grid to ensure the safety of the repair crew. The electricity storage can be used during blackouts.

Just like any other off-grid system, the cost of off-grid solar power systems can be easily calculated when you identify the energy requirements, battery capacity, and additional ...
