

Croatia's renewable energy association says the country has now deployed more than 1 GW of solar. Speaking at the site of an ongoing 99 MW project development, Prime Minister Andrej Plenkovic ...

Croatia plans to launch two solar tenders in 2025, according to the country's indicative annual publication plan for the year, which is now available on the Ministry of Environmental Protection ...

According to the operator, households added 8,143 power plants, and entrepreneurs 1,678. Solar power capacity is on track to overtake hydropower by 2040 It means that the number of solar power plants increased ...

Croatian electricity producer Lux Solaris has submitted a request for an environmental impact assessment (EIA) of a project for the construction of a 650 KWp solar photovoltaic (PV) power plant, the environment ministry said ...

Croatia achieved a major milestone in 2025 by surpassing 1 GW of installed solar capacity, marking a significant step in its renewable energy journey. This development ...

The growing interest in solar power for self-consumption is evident from the high number of approved grid connection applications, according to Croatia's distribution system ...

Croatia is raising the stakes on clean energy with a new round of auctions for solar, wind, and hydropower projects. These subsidies aim to attract private investment and curb reliance on foreign energy.

In late April, Austrian renewable energy company RP Global began construction of the 21 MW Novalja solar power plant on the Croatian island of Pag. This project is set to ...

Forte Solar d.o.o. specializes in the consulting, design, and installation of solar power plants in Dalmatia, offering high-quality solar panel systems that utilize advanced technologies to ...

The Korlat solar power plant is part of a larger energy complex in northern Dalmatia, which also includes a 58-megawatt wind power plant of the same name. The expected annual output of the Korlat photovoltaic power ...

This dominance further solidifies Croatia's commitment to renewable energy, with solar now representing a substantial portion of the energy mix. As reported by PVKnowhow, ...

Retractable solar panels quotation in Croatia 2025

The latest SolarKal Quarterly delivers a fresh take on what lies ahead for the solar industry. We're unveiling The SQ's Top 25 Solar Predictions for 2025. From solar ITC stability to rising tariffs, steady interest rates, and ...

The first tender, with a budget of EUR10 million, will be aimed at installing residential solar arrays in the second quarter of 2025 and will cover up to 50% of the investment costs.

Croatia's largest solar power plant, SE Korlat, is set to redefine the nation's energy landscape, providing clean electricity to as many as 100,000 households. With construction imminent and operations slated to begin next ...

This growth builds upon the positive trend observed in 2024, where Croatia was already projected to surpass 1 GW of solar power by 2025, driven by supportive government ...

The main costs of solar energy systems include equipment costs for solar panels and batteries, installation fees, and maintenance expenses. A typical 6 kW solar panel system can range ...
