

Retractable solar panels turnkey solution price in Malaysia

How much does a solar panel installation cost in Malaysia?

A typical residential solar panel system in Malaysia is 6.6kW and a good quality installation will cost between RM18,500.00 up to RM30,000.00. But why the big difference in cost? Whether a 6.6kW system is an appropriate size installation for you or not is a good question and will depend on your electricity usage.

Can You DIY solar panels in Malaysia?

No. Installing a home solar system by doing-it-yourself might be appealing, but several factors discourage DIY solar panel installation in Malaysia: Solar panels in Malaysia are not readily available to the public. Procuring the required equipment may be challenging and could lead to higher costs and logistical hurdles.

Why should you choose solarvest in Malaysia for residential use?

Solarvest offers tailored and customised solar PV systems in Malaysia for residential use. We help you select the most suitable system based on your energy requirements, roof space, and budget. Our high quality solar PV solutions provide maximum efficiency and longevity, catering to all household needs.

How to choose a solar panel supplier in Malaysia?

Choosing a solar panel supplier in Malaysia is no longer just about price alone, it's about system ownership, NEM eligibility, long-term support, and updated tariff impact. If you want full control and faster ROI, owning your system through trusted suppliers like Plus Xnergy, Solarvest, or SolarNRG makes the most sense.

Do solar panels save money in Malaysia?

Given the amount of sun in Malaysia, you will save a lot of money on your electricity bill after installation. For instance, a 6.6-kW solar system that generates around 10,000 kWh per year could save about RM3,800 - RM6,400 yearly. This means you could potentially recoup your investment and payback your panels in as little as 5 years.

Which solar inverter should I buy in Malaysia?

It is much better to pay a little bit more and get a reputable brand that has been servicing the Malaysian market for a few years such as Canadian Solar, Longi or Jinko. You can also choose to opt for a European made inverter and pair this with a premium solar panel.

The scope of work for your solar project is laid out in the initial EPC contract, as is the lump sum cost of the project. The contract price includes everything that's needed to design, build, and install your turnkey system. To ...
