

Is there a solar rebate available in Oregon?

In Oregon, solar systems combined with storage (batteries) can qualify for a rebate under HB2618. These rebates are on a first come, first served basis for complete applications.

Can I add battery storage to my solar system?

Yes, you can add battery storage to existing solar systems. Doing so can qualify for Energy Trust incentives and federal tax credits. However, to receive the Oregon Solar + Storage rebate, you must install the solar and battery storage at the same time. Why choose solar + storage instead of just a backup generator?

Are solar panels tax deductible in Oregon?

Expenses that are included to claim the tax credit are: solar panels/modules, contractor labor and costs, balance of system equipment (i.e. wiring, inverters, and mounting equipment). Oregon does not offer a tax deduction for solar panels. However, solar systems combined with storage (batteries) can qualify for a rebate under HB2618.

Does Portland General Electric have a smart battery pilot?

Portland General Electric offers a smart battery pilot for eligible customers, which may provide bill rewards. Solar panels convert sunlight into electricity, and a solar inverter converts this energy from direct current to alternating current for use in your home. The inverter also manages the flow of energy between your home and the battery.

Why should you consider a solar & battery storage system?

Solar panels can power your home with clean, renewable energy and reduce your energy bills. Adding smart battery storage provides greater control, convenience, and peace of mind, making your home energy resilient.

Does Energy Trust offer cash incentives for solar & smart battery storage?

Energy Trust offers cash incentives for qualifying solar and smart battery storage systems to decrease the upfront cost of your project. If you meet income guidelines, you may qualify for Energy Trust's Solar Within Reach increased incentives for solar + storage.
