

63 GW of utility-scale generation capacity will be brought online this year, and 81% of that capacity will be solar and battery storage, said the Energy Information Administration.

The sale includes all Pacific Current's operating solar and battery energy storage facilities on Kauai, Oahu, and Maui. The transaction continues HEI's execution of its Pacific Current ...

In this blog, we unpack the latest trends driving the EV and EV-battery industries, the new wave of battery-focused policies, influenced by China's latest moves and how they stack up against the US and EU, and what it all ...

Welcome to our EU Market Outlook 2025: Mid-Year Analysis. This publication marks a new addition to SolarPower Europe's solar and battery storage market outlook series. ...

Save on solar with the best California solar panel incentives in 2025, including the solar tax credit, SGIP rebates, property tax exclusions, and more. Schedule a free ...

US solar, battery manufacturing to expand through 2027 despite uncertainty: Anza Renewables This year, Anza sees tighter supplies and higher prices for U.S.-made solar cells and battery components ...

This growth highlights the importance of battery storage when used with renewable energy, helping to balance supply and demand and improve grid stability. Energy ...

Solar power and battery storage are expected to lead new U.S. generating capacity additions in 2025, according to the Energy Information Organization (EIA). The EIA ...

The 19GWh battery storage facility will enable seamless integration of solar power into the grid. By integrating state-of-the-art renewable technologies with energy storage solutions, this landmark project exemplifies ...

A battery energy storage system (BESS) is a type of energy infrastructure that plays a critical role to support the function of the California electrical grid. Many large-scale BESS projects are connected to the grid through utilities and can ...

In total, new solar projects in 2025 are expected to make up more than 50% of the planned added utility-scale electric generation for 2025. Combined with planned battery ...

That's 322,689 customers through June 2025 that we have helped through one of our many payment and

assistance programs. CPS Energy secured 120 MW of battery energy storage with San Antonio-based developer of clean energy ...

July 4 update: President Trump signed the "One Big Beautiful Bill" into law. Residential solar and/or systems installed by December 31, 2025 will still qualify for the 30% consumer solar...

The size of the battery energy storage fleet in Australia's 0:03 Hatta dives into the NEM's 16 GW pipeline of battery energy storage projects The pipeline is a database of battery projects in the ...

There are two components in determination of the system ELCC capacity: system base case and system change case. Both components for the applicable Summer and Winter seasons will ...

For combustion turbine and battery storage technologies, capacity might be added in regions with higher renewables penetration, particularly solar, to meet regional capacity reserve ...
