

What is a solar blanket in camping?

A solar blanket, in the context of camping, is a specially designed foldable solar panel for easy storage. It is perfect for harnessing the free power from the sun when camping off-grid or in a caravan to put power back into your battery setup.

Should you buy a solar blanket?

Whether you're topping up a lithium battery, powering a portable power station, or keeping a portable camping fridge up and running, a solar blanket delivers energy you can count on where you need it most. If you're after a complete off-grid setup, our 4WD solar panels and solar panel folding kits are well worth exploring too.

Can a solar blanket be used with a battery?

This means it can be used with a wide range of battery-powered devices and systems, making it versatile for various applications. The handy tabs along the sides of the solar blanket enhance its usability in outdoor settings.

Can I use the solar blanket to charge 12V batteries?

- o Ensure nothing sharp or heavy could potentially damage the solar blanket during transport or storage.
- o Only use the solar blanket to charge 12V batteries.
- o The PWM controller is only suitable for regulating solar modules.

What is a SunPower cell solar blanket?

Using Uni-Solar cell technology, this blanket incorporates a triple layer system and is optimized to capture the full spectrum of light. If you're looking for flexibility with your solar power, then REDARC's selection of SunPower Cell folding solar panels are your go-to.
