

How does the battery monitoring app work?

With an integrated stable Wi-Fi connection, this Android app enables real-time monitoring of multiple batteries, allowing you to view charging current, voltage, and remaining time, as well as charging modes and any abnormalities that may arise. This capability ensures that you maintain optimal battery performance and longevity.

What is a battery charger?

Battery Charger offers an efficient solution for remotely monitoring and managing your 12V battery charging processes.

Why should you use a battery charger?

Enhancing safety, it supports alarm notifications for any abnormal charging behaviors to prevent potential issues. Battery Charger also automatically generates detailed charging history reports, letting you assess battery charging performance anytime, offering a reliable method to gauge and enhance the lifespan of your batteries.
